Sportsman of the Year– Travis Guevara

Sportsman of the Year- Ashley Hayes

# From the Mayor's Desk

Dear Fellow Citizens,

Road construction across Denton County has been ongoing for many months, and we are beginning to see great progress. I-35 is beginning to take shape in our area, and Swisher Road is scheduled to be complete in the next 3 weeks, pending weather. Updates regarding I-35 are regularly posted on our website to help you schedule the best times and alternative roads to drive.

In Hickory Creek, the reconstruction of Main Street will begin within the next 3 weeks. Construction will begin at the Westlake Park entrance and move westward into Lake Dallas. Main Street will be down to one lane much of the time. Alternative routing will take place through Lakewood Gardens and Royal Oaks to Hickory Hills.

Road repairs will also take place throughout the town beginning in the next 2 weeks. These include repairs in Lakewood Gardens at the intersection of Lakewood & Hook, Chasewood & Hook, and curbing throughout the subdivision. Multiple flumes will also be replaced. Repairs will also be made to Country Lane, Northfield, Deerpath, and Harbor Grove Park. Hickory Hills Boulevard through Royal Oaks will see construction begin in 3 months. Lakeview subdivision will see repairs on Barkley, Mead, Redbluff, and Shasta. Sidewalks will be added around town hall pond and extended along Ronald Reagan Avenue. The town will also begin the process of asphalt pavement preservation throughout the entire town.

We appreciate your patience during this construction phase. Please be cognizant of speed while repairs are taking place. Workers will be present and safety is our top priority! Distracted drivers endanger their own lives and the lives of others. Please remember, "Talk. Text. Crash!"

The Town of Hickory Creek website will have updates as the construction process begins. Please go to [www.hickorycreek-tx.gov](http://www.hickorycreek-tx.gov) for the most accurate information.

Best Regards,  
Mayor Lynn Clark

## LCMUA Proposition 1

Authorize the Board of Directors of Lake Cities Municipal Utility Authority to levy, assess, and collect annual ad valorem taxes on Taxable Property within the Authority in accordance with the laws of the State of Texas for the continued maintenance and operation of the Authority's water and sewer systems.

### EARLY VOTING

**APRIL 25 – 30**

**&**

**MAY 2 - 3**

MULTIPLE LOCATIONS & TIMES

### ELECTION DAY

**MAY 7**

LOCATION:

LAKE DALLAS CITY HALL  
212 MAIN ST, LAKE DALLAS

TIME:

7:00 AM — 7:00 PM

Additional Information is available at <http://www.votedenton.com/>

"Our mission is to produce and distribute safe, high quality water for domestic and commercial uses as well as provide fire protection, all at the most economical cost to our customers.

Your vote in this election will tell me and the other Board members if you want some of the needed revenues to come from property taxes or if you'd prefer to rely on rates paid on monthly water bills."

*Cecil Carter, Board President*

**LCMUA IS HOLDING  
AN ELECTION TO GET  
YOUR INPUT**

**THIS IS IMPORTANT FOR  
EACH OF US AND  
OUR COMMUNITIES**

**IF PASSED, IT WOULD  
ALLOW LCMUA TO  
LEVY A PROPERTY TAX**

**LCMUA NEEDS  
ADDITIONAL FUNDING**

**A TAX IS NOT  
THE ONLY OPTION**

### Lake Cities Municipal Utility Authority

Next Board Meeting  
May 16, 2016 at 7:00 pm

501 N Shady Shores Dr.  
Lake Dallas, TX 75065

Phone: (940) 497-2999  
Web: [www.lcmua.com](http://www.lcmua.com)

## Background

Lake Cities Municipal Utility Authority (LCMUA) has a duty to provide continuous and adequate service to its service area, which includes Lake Dallas, Shady Shores and Hickory Creek. At its January 11, 2016 meeting, the LCMUA Board ordered an election to be held for the purpose of seeking approval for collection of property taxes. LCMUA is granted taxing powers through its enabling legislation, and actually had a property tax until 1994. The Board called the election to get voter opinion on using property taxes as another means to fund the necessary operational costs of the utility in addition to water and sewer rates.

To carry out its mission, LCMUA must continually repair or replace existing facilities as well as expand systems to support growth. Line repairs, such as the patch shown below have been performed on many segments of the older system lines, but full replacements will ultimately be necessary as lines deteriorate.

Failed Line Showing Previous Patching Repairs

This is a challenge facing utilities around the nation. In its 2012 nationwide report titled, *Buried No Longer: Confronting America's Water Infrastructure Challenge*, the American Water Works Association (AWWA) states, "restoring existing water systems as they reach the end of their useful lives and expanding them to serve a growing population will cost at least \$1 trillion over the next 25 years... Delaying the investment can result in degrading water service, increasing water service disruptions, and increasing expenditures for emergency repairs. Ultimately we will have to face the need to "catch up" with past deferred investments, and the more we delay the harder the job will be when the day of reckoning comes."

## Capital Improvement Program

A number of years ago, LCMUA began developing a plan that would encompass present water and sewer needs and anticipated future growth of the service area. It engaged the professional engineering company Belcheff & Associates, Inc. (Belcheff) that developed population and demand estimates of the future growth of each of the municipalities served.

The original plan was accepted and approved by the Texas Commission on Environmental Quality (TCEQ) in 2012. It has been recently updated. To maintain required capacity, LCMUA will have to build larger water and sewer facilities for a greater pressure plane. All these plans went through the approval process at the TCEQ.

As part of its work, Belcheff recommended a number of projects in the next five years as shown in the tables to the right. Given the totals required, LCMUA will likely need to issue debt to fund the projects.

Water Projects	Cost (\$)
Phase I Waterline Loop	6,036,300
North Pump Station	198,500
Misc. Development Participation	585,300
Water Master Plan and CIP Updates	21,000
<b>Total Water Projects</b>	<b>6,841,100</b>

Wastewater Projects	Cost (\$)
Lift Station No. 7 Improvements	3,184,900
Shady Shores Rd Interceptor Phase 1	253,300
Shady Shores Rd Interceptor Phase 2	435,500
Lift Station Abandonment Project	239,000
Misc. Development Participation	585,300
Sewer Master Plan and CIP Updates	21,000
<b>Total Wastewater Projects</b>	<b>4,719,000</b>

## LCMUA Operational Statistics

### SERVICE AREA

3 Cities

Over 4,600 Customers

Population of More  
than 14,000

### WATER SYSTEM

81 Miles of Lines

801 Valves

529 Fire Hydrants

3 Elevated Storage  
Total 600K Gallons

3 Ground Storage  
Total 1.2M Gallons

3 Water Wells

4 Pump Stations

### SEWER SYSTEM

58 Miles of Lines

262,371 Linear Feet  
of Gravity Pipe

42,300 Linear Feet  
of Force Main Pipe

20 Sewer Lift Stations

611 Manholes

## Financial Forecast & Revenue Need

LCMUA engaged NewGen Strategies and Solutions LLC. (NewGen), a firm of environmental economists and rate specialists, to make a forecast of water and sewer rates necessary to pay for the required new infrastructure and ongoing operations. NewGen worked with staff to develop a forecast of required costs for the next five years including expected capital previously mentioned. Once costs were estimated into rate revenue requirements, NewGen estimated how well the current rates would perform if unchanged in future years including normal consumption and growth in customers. As shown below, this estimate clearly illustrates that current rates are not going to adequately meet LCMUA needs.

	FY 2016	FY 2017	FY 2018	FY 2019	FY 2020
<b>WATER</b>					
Revenue Need	\$3,994,103	\$4,793,694	\$4,963,643	\$5,182,553	\$5,480,289
Projected Revenue Under Current Rates	4,044,509	4,096,816	4,150,169	4,204,588	4,260,097
<b>Over / (Under) Recovery</b>	<b>50,406</b>	<b>(696,878)</b>	<b>(813,474)</b>	<b>(977,965)</b>	<b>(1,220,192)</b>
<b>WASTEWATER</b>					
Revenue Need	\$3,076,603	\$3,498,733	\$3,633,778	\$4,045,761	\$4,267,791
Projected Revenue Under Current Rates	2,473,517	2,512,018	2,551,290	2,591,346	2,632,204
<b>Over / (Under) Recovery</b>	<b>(603,086)</b>	<b>(986,715)</b>	<b>(1,082,489)</b>	<b>(1,454,415)</b>	<b>(1,635,586)</b>
<b>TOTAL</b>					
Revenue Need	\$7,070,707	\$8,292,427	\$8,597,421	\$9,228,315	\$9,748,079
Projected Revenue Under Current Rates	6,518,026	6,608,834	6,701,458	6,795,935	6,892,301
<b>Over / (Under) Recovery</b>	<b>(552,681)</b>	<b>(1,683,593)</b>	<b>(1,895,963)</b>	<b>(2,432,380)</b>	<b>(2,855,779)</b>

## Revenue Alternatives

The alternatives are funding through either [1] an ad valorem tax and water and sewer rates or [2] increased water and sewer rates. Without an ad valorem tax, LCMUA monthly utility rate increases will need to be higher than with a taxing option. Taxes were estimated including an estimate for non-collections for all of LCMUA areas, and it was determined that an \$0.18 tax would cover the Fiscal Year 2017 shortfall. The Board has not settled on a rate amount at this time, but has considered a range from \$0.15 to \$0.25. Tax levy amounts for the average homeowner are estimated below assuming \$0.18.

City	Average Home Taxable Value	Average Home Estimated Levy (Annual)	Average Home Estimated Levy (if Monthly)	Total City Taxable Value	Total City Estimated Levy
Hickory Creek	\$ 216,391	\$ 390	\$ 32	\$ 409,114,376	\$ 736,406
Lake Dallas	\$ 140,149	\$ 252	\$ 21	\$ 368,281,451	\$662,907
Shady Shores	\$ 253,015	\$ 455	\$ 38	\$ 261,860,486	\$ 471,349

While not a recommendation, the projected shortfall could also be made up simply by increasing both water and wastewater minimum charges and achieve a similar level of certainty as with the ad valorem tax option. This would increase monthly cost to a normal resident by \$57. From these estimates, the property tax option reduces the total cost to the average resident as compared to adjusting minimum monthly charges.

## Creating healthy habitat for fish

Picture your favorite fishing hole. Would you prefer clear blue water and fresh air or a lake covered in a thick layer of greenish-brown algae, festering under the sweltering summer sun and complete with a shimmering trail of engine oil and grease? There are a few steps residents can take at home and their yards to ensure that local lakes provide healthy habitat for fish and enjoyable fishing opportunities for years to come.

1. **Think like a fish.** Fish, much like people, like to have clean water to swim in. Any pollutant that lands on a sidewalk, driveway or road can eventually be washed away into a storm sewer or roadside ditch and wind up in our local lakes and rivers. Sweep up any spilled herbicide, pesticide, fertilizer or road salt from paved surfaces around your home, repair any engine leaks on your car and dispose of used engine oil properly at a drop-off facility.
2. **Give a breath of fresh air.** When algae grows out of control on a lake due to excess phosphorus in the water, it creates a chain reaction that reduces the amount of overall oxygen in the water, resulting in fewer, smaller fish and sometimes even mass fish kills. Help reduce the amount of phosphorus that enters lakes by keeping grass clippings and other yard waste off of paved surfaces and using zero-phosphorus dishwasher detergent.
3. **Save some shade.** Fish require shady, vegetated habitats for spawning. If you have shoreline property, leave at least half of it unmowed and under natural cover to create habitat for fish. Enjoy a view of the water without destroying its ability to support aquatic life.

# NEW TOWN HALL HOURS

**Beginning May 16 the new hours for the Hickory Creek Town Hall, located at 1075 Ronald Reagan Avenue, will be:**

**Monday to Thursday**

**7:00 a.m. to 4:30 p.m.**

**Friday**

**7:30 a.m. to 11:30 a.m.**

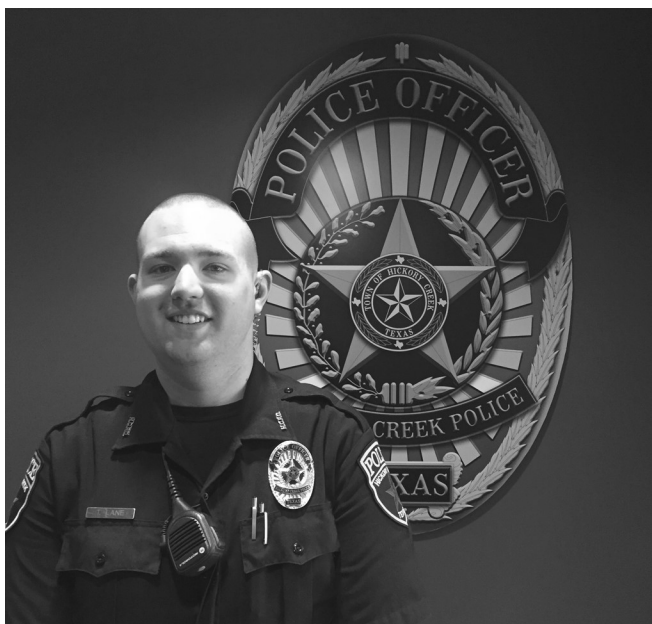

# Employee Spotlight

## Rita Woodall—

Rita is the Deputy Court Clerk and has been working here since October 2015. She lives with her husband in Denton and they love the Texas Rangers. Rita says she enjoys working for the Town of Hickory Creek because it is a beautiful town and all the residents have been warm and welcoming.

## Taylor Lane-

Taylor is a Hickory Creek Police Officer and has been working here since March 2014. As a child he always had a passion for public safety. His family knew he was destined to be a Police Officer after they purchased a toy light bar for his “little tikes” car. His senior year of High School he joined the local Volunteer Fire Department. Easter Sunday of 2010 he was called to a major accident in his small town. Once on scene he realized the individuals involved were his High School Football Coach and an intoxicated driver. His coach died at the scene. At that moment he decided to become a Police Officer to prevent those accidents before they occurred. He graduated from Texoma Regional Police academy with a Texas Basic Peace Officer License. He worked in the Denton County Jail for one year before he was hired at the Hickory Creek Police Department. When he’s not working he enjoys riding motorcycles, attending church events, and spending as much time as possible with his family.

## *Chief's Corner*

*April 2016*

The Hickory Creek Police Department, in cooperation with the Denton County Sheriff's Office and other agencies in Denton County, have created a website for the citizens of Denton County and the citizens of other participating cities to view what is happening in Denton County ([p2c.dentoncounty.com](http://p2c.dentoncounty.com)). This site also provides residents the opportunity to better communicate with your local law enforcement agency. The Hickory Creek Police Department welcomes the citizens of Hickory Creek to explore the site and see how the department can better serve you.

One of the features of this site allows you to view the calls for service that we are currently on or have completed and closed (CURRENT CAD CALLS and CLOSED CAD CALLS). Another feature the Police Department is utilizing is the SECURITY CHECK feature. This allows residents to request a vacation check of their property on-line. A vacation check is to be used when you need some assistance in keeping your home and property secure while traveling. Officers on every shift will come by and inspect your property for signs of criminal activity or an intruder and log the date and time of their checks. The request will be entered directly into the police dispatch computer system, giving the field officer quick access to the information in the event of an emergency. The citizen will receive an email advising them the Hickory Creek Police Department has received the request and the request will be completed.

Some features on the site are Denton County Sheriff's Department specific and may not apply to Hickory Creek, i.e. crash reports. For those features that do not apply, the information may be obtained directly through the Hickory Creek Police Department website. The Hickory Creek Police Department has added links to both the vacation/security watch and the P2C site. The Denton County Sheriff's Office and the Hickory Creek Police Department encourage the citizens to visit the site and see how this new tool can benefit each of you!

**DON'T TEXT & DRIVE.**

## WAYS YOU CAN HELP ELIMINATE MOSQUITO BREEDING GROUNDS

With all the recent news about mosquitoes and the diseases they can spread, everyone one needs to take extra steps to remove potential mosquito breeding grounds around their homes. Please remember to:

- Fill in tree rot holes and hollow stumps that hold water.
- Drill holes into the bottom of tire swings.
- Turn over plastic wading pools when not in use.
- Dispose of old tires, buckets, ceramic pots and other containers in your yard that may collect water.
- At least once per week, empty standing water from containers, including birdfeeders, on your property.
- Drill holes in the bottom of recycling containers that are left outdoors. Drainage holes in the sides of containers allows enough water to collect in which mosquitoes may breed.
- Clean clogged roof gutters, particularly if the leaves from surrounding trees have a tendency to plug up the drains.
- Turn over wheelbarrows when not in use.
- Store boats covered or upside down, or remove rainwater weekly.
- Aerate ornamental pools or stock them with fish.
- Clean and chlorinate swimming pools that are not being used. Be aware that mosquitoes may also breed in the water that collects on swimming pool covers.
- Keep drains, ditches and culverts free of grass clippings, weeds and trash so water will drain properly.
- Fill in low areas on your property to eliminate standing water

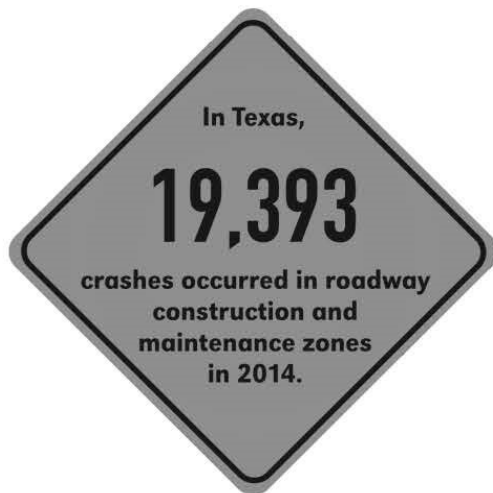

To help prevent mosquitoes, the standing water in your yard has got to go. This will be the start of your anti-mosquito campaign!

# DRIVE SAFE IN WORK ZONES SO WE ALL GET HOME

With more than 2,500 active work zones at any given time in Texas, you can expect to see roadside workers and vehicles when you travel on Texas roads.

Slow down, pay attention and obey all traffic signs — so we ALL get home.

**146**  
FATALITIES

**670**  
SERIOUS  
INJURIES

**87%** of fatalities were **MOTORISTS** traveling through a work zone.

## Two Leading Factors for Work Zone Crashes

FAILURE TO  
CONTROL SPEED

DRIVER  
INATTENTION

**40%** of fatal work zone crashes involved drivers who were driving under the influence (drugs or alcohol) or distracted.

The majority of fatalities in work zones were in the **age range of 18 to 44.**

**22%**  
FEMALE  
FATALITIES

**78%**  
MALE  
FATALITIES

The information contained in this report represents reportable data collected from the Texas Peace Officer's Crash Report (CR-3).  
This information was received and processed by the department as of February 11, 2015.

**BE SAFE. DRIVE SMART.**

## Facts:

- During the past 5 years in work zone crashes more than:
  - ❖ 4,400 persons died
  - ❖ 200,00 persons were injured
- Rear-end crashes are the most common type of work zone crash
- The majority of fatal work zone crashes occurred on roads with speed limits greater than 50mph
- Stopping distance for motor vehicles at 50mph:
  - ❖ Dry roadway – 300 ft
  - ❖ Wet roadway – 400 ft
- A loaded 80,000 lb. tractor-trailer requires almost 50% more stopping distance
- It Only Takes An Extra **25 Seconds** To Cover **1 Mile** At 45mph Compared To 65mph
